---

## PROFESSIONAL SUMMARY

Results-driven Software Engineering graduate eager to contribute as a Trainee Developer. Passionate about modern web ecosystems with hands-on project experience in the MERN Stack and Next.js, with a strong focus on building fast, serverless applications. Proficient in Java, PHP, and SQL, combined with structured problem-solving skills and a strong commitment to learning advanced cloud architectures and machine learning.

---

## TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript (ES6+), PHP, SQL, HTML5, CSS3
  - **Frameworks & Runtimes:** Next.js, React, Node.js, Express.js, .NET, Bootstrap
  - **Databases:** MongoDB, MySQL, PostgreSQL, Firebase Realtime Database, SQLite
  - **Tools & Platforms:** GitHub, Git, GitLab, Firebase, RStudio, Visual Studio, NetBeans IDE, Vercel
  - **Design & Graphic Tools:** Figma, Adobe Photoshop, Visio, Draw.io
  - **Architectures:** MVC (Model-View-Controller)
  - **Interpersonal Skills:** Teamwork, Leadership, Active Listening, Responsibility, Dependability
- 

## KEY PROJECTS

### Construction Management Web Platform (2025)

**Tech Stack:** *React, Node.js, Express.js, MongoDB, HTML5, CSS3*

- Designed and developed a comprehensive web-based platform to streamline construction project management from initial planning to final completion.
- Implemented a robust MERN stack backend to handle dynamic data processing and real-time updates for project tasks.
- Created an intuitive, responsive user interface ensuring smooth navigation and role-based access for stakeholders.

### Online Bookstore System (2025)

**Tech Stack:** *Java Servlets, JSP, MySQL, HTML5, CSS3*

- Developed a secure web-based Library and Bookstore Management System utilizing Java Servlets and Java Server Pages (JSP).
- Integrated a MySQL database for efficient data management while applying MVC architecture to isolate business logic, significantly improving system maintainability.

## Sri Lankan Tourism & Adventure Booking Platform (2025)

**Tech Stack:** PHP, MySQL, JavaScript, Bootstrap, HTML5, CSS3

- Engineered a dynamic tourism and adventure booking web application tailored for travelers exploring Sri Lanka.
- Built a responsive front-end using Bootstrap and JavaScript to provide an engaging user experience across all devices.
- Handled server-side operations and secure database queries using PHP and MySQL to manage bookings smoothly.

## California Housing Price Prediction Model (2025)

**Tech Stack:** Python, Google Colab, HTML5, CSS3

- Built and evaluated machine learning regression models, including Linear Regression, Random Forest, and Decision Trees, to forecast housing prices.
- Utilized Python and Google Colab environments to perform data cleaning, exploratory data analysis (EDA), and feature engineering.

## FitZone Fitness Center Web Application (2025)

**Tech Stack:** PHP, MySQL, JavaScript, Bootstrap, HTML5, CSS3

- A responsive, user-friendly web platform designed for a modern **gym and fitness center**, offering online membership management, workout guides, and contact services.
- The site includes an admin dashboard for managing users and contact messages — built using PHP, MySQL, and HTML/CSS.

---

## EDUCATION

### BSc (Hons) in Software Engineering

Cardiff Metropolitan University, UK | *Graduated: 2025*

### G.C.E. Advanced Level Examination (Technology Stream)

Swarnajothi National College, Kiribathkumbura | *Year: 2021*

## CERTIFICATION

### Advanced information Technology

Siba Campus | *Completed: 2019*

---

## LANGUAGES

English (Fluent)

Sinhala (Native)
